**oleodynamic cylinders
and mechanical
device components**

OUR COMPANY

In the actual productive sceneries, is absolutely necessary to pay the maximum attention to the needs of the customer who asks for a more and more competent and reliable interlocutor for the technical development and the supply of high quality components.

Its srl is a young and dynamic company, our structure and equipments are particularly finalized to flexibility and avaiability to answeat at best to client's expectations and provide appropriate technical product in oleodynamic cylinders field and in the specific workings of mechanical details for special works destined to machinery used in printing, paper and converting fields.

All the details that make up the cylinders are submitted through suitable instrumentations to careful controls and to a final testing.

We can satisfy all your requests from the single piece up to the series. The requests for special cylinders are submitted to our technical department which draws up the project.

CNC work stations sector

Cutting sector from 20 to 280 mm diameter

MDM Mecatronic Catrim measuring machine

Graziano SAG CNC lathe 406 turning diameter 350 x 1300 mm

CNC 5 axles processing

Automatic welding

SPECIAL WORKS

To guarantee the high-level qualitative standards, the process of production is submitted to periodic controls with particular attention to the final testing to assure conformity according to required standards.

Thanks to our sophisticated software (cad 3d-2d), the realization of the ended product is carefully analyzed, considering and managing all the possible variables that can take over during the use.

Converting Machinery parts

Textile Machines parts

Self-expanding sectors mechanical chucks

Motor-cycling Tuning titanium parts

Self-expanding sectors mechanical chucks with bearing rotation

Railway vehicle springs testing equipment

AGRICULTURE

Three point linkages hydraulic top links and lift links for all type and series of agricultural tractors.

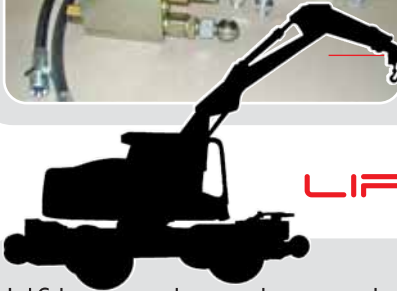

Hydraulic three points linkage with CBM 3 hook NEW HOLLAND

Spare parts

JOHN DEERE three point link and lateral links

LIFTING

Lifting and earth-moving machines cylinders.

Stabilizer cylinder

Moving and yard cylinder

Arm lift cylinder

SPECIAL CYLINDERS

Special cylinders under customer specification.

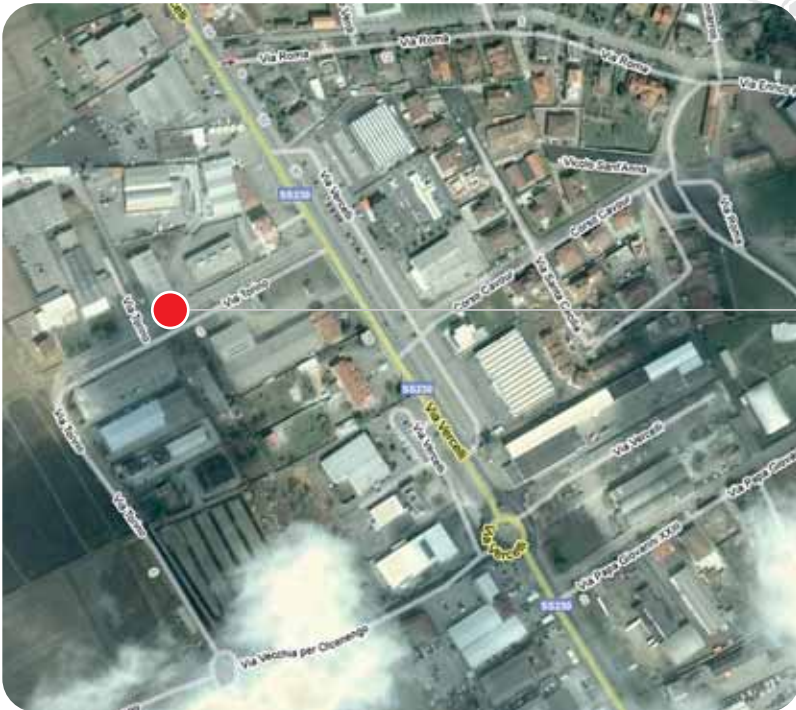

Stainless Steel INOX 316 for navigation and gangways cylinder

Bending machines cylinders

Press for plastic extrusion cylinder
